B. Ramalingaradhayan Esq
Secretary to the Government of Mapore
General and Revenue Department

Sir,

I have the honor to bring to the notice of Government that the City Trust Board appear to me to have failed on the three most essential points of improvement viz water supply the carrying off the storm water and drainage. As regards the fresh water supply, it is very precarious, and with the increased extensions of the town now being carried out it will become more so under the present system whenever there is to be any large gathering in the town, we have to store water for some time before hand this supply even sometimes during the festival need deficiency the towns people of water to a great extent

for sometime afterwards the cause of numerous Complaints

As regards the 2d point the drainage of storm water, the present System is quite inadequate as was demonstrated during the last heavy shower of rain of about an hour which fell in about an hour and during which time and afterwards all the lower part of the town was under water and merchants and others were afraid of their houses collapsing and Complained bitterly to me about it, this defect can I believe be easily remedied

As regards the 3d point drainage, the actual drainage in the laying of drains, sewage pipes and sanitie cisterns &c is, to the best of my belief admirably carried out but the whole System does not work for want of sewage, the larger majority of which soaks into the ground as it has done from time immemorial, the defects here undoubtedly lie in the failure to

the proper house Connection with the
Drains - In this the Municipality have been
doing their best this is most unsatisfactory
and I believe that it would be far more
Satisfactory for the Trust Board to carry
this out, so that one uniform System can
be adopted At present although the Trust
Board has been at work for nearly three
years no single part of the City has been
finished and handed over to the Municipality
to work and see what improvements have
been actually gained, and be able to point
out to the Trust Board their faults to be
rectified by them in carrying out other
improvements of the City.

I have considered it my duty to bring
this to the notice of Government as consi-
dering the enormous sum of money now
being expended on the City I think that
the three main points should receive the
most Consideration before the improve-
ments.

improvements are attempted although
I have known him for some time he
I have waited for a year to enable
me to speak from experience and which
I now do -

I have the honor to be,

Sir,

Your most obedient servant
